

of Kaituma marks the end of the Japanese pursuit.

The Telegram's Tokyo correspondent intimates that the pursuit is going on. He says that Kirin and Changshun probably will be the next captures. Serious Russian resistance south of Harbin is not expected.

Another Tokyo report says it is expected that the Russians will defend the line from Changshun to Kirin. This view is strengthened by consideration of the strategic importance of Kirin. It will be reduced if they abandon the rich Kirin province, which is one of the most fertile parts of Manchuria and where they hoped to obtain large food supplies.

If they do not secure these it is believed that the whole army will be jeopardized, the Trans-Siberian Railway not being able to carry supplies enough to feed it, while the loss of Mukden and Kirin will cut off the Russian supply lines, on which the army hitherto largely depended.

It is reported that part of the Vladivostok garrison has hurriedly left for Harbin.

The Tokyo correspondent of the Telegram says that the Chinese governor of Liao-Yang and thirty-two of his relatives have admitted that they acted as Russian spies throughout the war. It is ominously announced that they will be punished by martial law.

### Third Division Sails To Join Baltic Fleet

CANEA, Crete, March 22.—The third division of the Russian Baltic fleet, commanded by Rear Admiral Niebov, sailed hence for Port Said.

LONDON, March 22.—A dispatch to the Daily Mail from Aden says that thirty steamers, with 100,000 tons of coal, are at Jibuti, French Somaliland, awaiting the third division of the Russian fleet.

ST. PETERSBURG, March 22.—A telegram from Ljuba says the authorities have not been able to organize the proposed fourth squadron on account of their inability to secure steamers.

Many of the officers are mere boys without any sea training and the crews are composed largely of peasants who were never on board a ship before their enlistment.

### Bomb Thrown in Warsaw Four Hussars Killed

WARSAW, March 22.—A bomb was thrown through a window of a building occupied by a number of hussars.

Four men were killed and several wounded.

The man who threw the bomb cannot be found.

LODZ, Russian Poland, March 22.—A police official named Stroganoff was severely wounded on the street here by revolver shots. The persons who did the shooting escaped.

### Czar Would Institute Compulsory Education

ST. PETERSBURG, March 22.—It is reported that the Czar intends to issue an order making compulsory education throughout Russia, and that the Zemstvos will be invited to send delegates to St. Petersburg to discuss the matter with the minister of public instruction.

### Russia Not Decided On Internal Loan

ST. PETERSBURG, March 22.—It is officially stated that no issue of an internal loan of 5 per cent has been decided upon yet.

In any case, the declaration is made, it is incorrect to say a loan will be issued at as low a price as 90.

Official announcements have been made of the appointment of General Kuropatkin as commander of the First Manchurian army.

This is the army which General Linévitch commanded before he was chosen to succeed Kuropatkin as commander-in-chief in Manchuria, so that the position of the two generals is now exactly reversed.

### Rennenkamp's Division Cut Off From Main Army

PARIS, March 22.—A dispatch to the Petit Parisien from Harbin says that heavy firing has been heard south of Tieling.

It is supposed that General Rennenkamp's division has arrived at Tieling to find it occupied by the Japanese. Consequently it is feared that Rennenkamp is surrounded.

A St. Petersburg dispatch to the Petit Parisien says that the situation of the Russian army in Manchuria is deplorable. In the rear of the retreating force follows a horde of 10,000 stragglers, half mad with starvation and fatigue, who rob all alike in the desperate effort to survive.

A dispatch to the Matin from Harbin confirms the report that General Kuropatkin has been placed in command of the first army, formerly commanded by Linévitch.

The St. Petersburg correspondent of the Matin reports that with M. Lellianoff, the mayor of St. Petersburg, the Russian declared that the future of Russia depended upon the arrangement of peace and the suppression of internal disorders.

He said it was impossible to continue the war, as the Trans-Siberian railway was on longer in condition to be used for the transportation of the necessary men and material. He added that Russian men of business could not trade in the present condition of the country.

### DELEGATION OF UTES CALLS ON HITCHCOCK

The delegation of Utes, who have been in the city a week interviewing the President, Commissioner of Indian Affairs Leupp, and other officials, called at the Department of the Interior this afternoon and held a consultation with Secretary Hitchcock.

They are seeking information concerning the plans of the Government concerning the reservation of the Utah Indian Reservation. They asked that the tribesmen be allowed to select the ground they want before the reservation is opened.

### FELL OFF OF WALL AT UNION STATION

Samuel Alexander, thirty years old, of 105 Twelfth street northeast, was struck on the head by a huge cement bucket while standing on top of a high wall at Union Station today.

He was knocked off the wall and struck the ground on his head, fracturing several ribs. He was taken to Casualty Hospital.

**COLDS CAUSE SORE THROAT**  
Laxative Bromo Quinine, the world wide Cold and Grip remedy, removes the cause. Call for the full name and look for signature of E. W. Grove. 2c.

## New Japanese Island Rises Out of the Sea

Has a Boiling Lake and a Peak Two Hundred and Forty Feet in Height—Volcanic in Origin.

TOKYO, March 22.—A new island 4,800 yards in circumference has emerged from the sea three leagues south of Iwojima, in the Rikuu Archipelago, between Japan and Formosa.

The first indications were observed last November 14, when frequent detonations were heard, lasting till November 28. On the latter date dense smoke began to rise and continued till December 5, when the outlines of an island became visible.

The island was visited on February 1 by inhabitants of Iwojima, who found the surface covered with volcanic tuff. The island was surrounded by a belt of sand, and there was a boiling lake near the northern end below a peak 240 feet in height.

### WHOLESALE FRAUDS ATTEND PUBLIC LANDS SEIZURE

(Continued From First Page.)

The State surveyor general as valuable coal land, has been filed with the register of the land office as coal land and has been taken up by the same interests through the State board as agricultural lands, thereby saving the company \$18.50 an acre, while defrauding the Government of \$20 an acre.

Cases as flagrant as this are numerous, and yet, it is stated, the Interior Department and its officials have allowed the practice to go on for years.

### Preventing Investigation.

Rockefeller and Gould's Utah Fuel Company has assumed to itself entire control of the Utah coal deposits, fighting off through Standard Oil methods all persons seeking to get a foothold. Although others have secured coal claims, the Standard Oil still controls the railroad and has kept others from producing.

The same interests control the Colorado Fuel and Iron Company, and the corporations command the coal situation in the mountain and coast States except Wyoming, where the Union Pacific mines have all they can do to handle local business.

E. H. Hartman's Union Pacific railroad sought to operate in Utah coal fields and was driven off. Senator W. A. Clark has been seeking to secure coal in these fields for his new San Pedro, Los Angeles and Salt Lake road, but the Rockefeller-Gould interests have fought him bitterly and so far have kept him out. Meanwhile the Standard Oil corporation has been busy gathering in all coal deposits it could and holding off all official investigations here.

### DISMISSAL THE FATE OF POLICEMAN HILE

Policeman Joseph F. Hile is to be dismissed from the Metropolitan Police Department. An order to this effect has been signed by Commissioner West, and despite the fact that it is held up to allow Hile's attorney, Vilton J. Lambert, to make a final plea in his behalf, Hile's duties as a policeman will cease at once.

The specification against Hile is that he allowed Willie F. Burge, a negro charged with murder to escape from the Homeopathic Hospital.

Hile was given a hearing before the police trial board February 8, found guilty of gross neglect of duty and fined \$25.

## Food Authority

A FAMOUS ENGLISH PHYSICIAN (WHO REQUESTS THAT HIS NAME BE WITHHELD FROM PUBLICATION) SAYS OF

## Grape-Nuts

"In cases of slow digestion, lack of stomach tone, and debility, this food is invaluable."

### Now for the reason:

The great bulk of human food is starch in some form—bread, pastry, potatoes, rice, cereals such as oats, wheat, rye, barley, etc.

This class of food supplies "energy" if it be properly digested, but there's the rub. Starch and sugar in food are digested by the liver and intestines. When these organs are overworked or become weak, then the food is not entirely digested and lies in the warm moisture of the body until it decays, producing gas, and, therefore, disturbance and incipient disease of the liver and intestines and frequently appendicitis.

To meet this trouble Grape-Nuts food was invented. In it the starch part of wheat and barley is transformed by long soaking, warmth, and time into sugar—just the same method as the body employs in digestion. Hence, when one eats Grape-Nuts he eats a pre-digested food, ready for immediate digestion and assimilation, supplying the body with the needed food elements in a soluble and delicious form.

### The London "Lancet" says:

"The features worthy of note in our analysis are the excellent proportion of proteid, mineral matters, and soluble carbo-hydrates per cent. The mineral matter was rich in phosphoric acid. 'Grape-Nuts' is described as a brain and nerve food, whatever that may mean. Our analysis, at any rate, shows that it is a nutritive of a high order, since it contains the constituents of a complete food in very satisfactory and rich proportion and in an easily assimilable state."

The food is naturally pre-digested by heat, moisture, and time. The diastase is thus produced, and the transformation of starch into sugar accomplished.

A perfect food for persons with weak intestinal digestion and who need, but cannot fully digest, ordinary bread and starchy food.

For athletes, brain-workers, or the weakest babe.

(For infants, pour hot water over three or four teaspoonfuls of the food. Use that water with a trifle of the food dissolved in it.)

"There's a Reason."

### VENEZUELAN PRESIDENT EVADES THE ULTIMATUM

(Continued From First Page.)

sonable. All that is asked is that mere justice be accorded to American interests in Venezuela.

Under orders of President Castro, flagrant injustice has been practiced. The United States feels that in offering to submit the whole controversy to arbitration, she has really made a great concession.

If Castro persists in his unreasonable and untenable course, it is not likely that the United States will make such a strict interpretation of the Monroe Doctrine as would prevent other nations securing their just rights, even if they should go to the extent of temporarily seizing Venezuelan ports.

President Roosevelt has repeatedly said that the Monroe Doctrine was never intended to protect the wrongdoer, or to ward off proper punishment, so long as that punishment did not take the form of permanent acquisition of territory.

Should the Venezuelan government display toward the United States a more friendly spirit, and endeavor to right the wrongs committed against American interests, by freely submitting the questions to arbitration, this Government would do all in its power to smooth over the difficulties between Venezuela and other foreign powers. Castro cannot expect the United States, however, to maintain a sympathetic attitude toward Venezuela, so long as he continues to oppress American citizens.

While it is not expected that Castro will at once accede to the demands of the United States, it is hoped he will be brought to see the folly of maintaining his present attitude, and will open the way for negotiations that will finally result in the desired arbitration.

### Keeping Close Watch On General Castro

Secretary Taft and several Senators discussed the Venezuelan situation with the President this morning, but none would make a statement. The President is keeping a close watch on developments in that country, and it is not believed by the Administration that serious results are likely to accrue. While the President is on his Southern trip he will be in constant communication with Washington and will be notified that goes on in foreign quarters which should be brought to his attention.

If Castro should remain obdurate and refuse to be pacified, trouble may come. In this event the President would probably hasten back to Washington from wherever he happened to be at the time.

### CORK COMPANY OFFICIALS MUST ANSWER IN COURT

Word reached the Department of Commerce and Labor today that all legal obstacles have been removed for the trial of the officials of the New Jersey Cork Company on charges of conspiring to defraud the Government, by placing iron bars in granulated cork intended for use in U. S. preserves.

An investigation is still being made to discover if any such life preservers ever were in the use of vessels, and if any have, the makers and users can be punished heavily under the law obtained by Department Commissioner of Corporations Smith at the last session of Congress.

### SYRIANS MUST LEAVE SANTO DOMINGO APRIL 1

Representative Syriens of New York have protested to the State Department against the decree of the Haitian government by which all Syrians will be obliged to leave the black republic on April 1.

An inquiry sent to Minister Powell and his response was that the decree does not apply to Syrians naturalized by the United States.

This makes it impossible for this Government to take any action.

The Syrians are to be expelled because, it is alleged, they demoralize the trade of the island.

### CORDOVA WOULD LIKE THE PRESIDENT'S AID

Seeking to Interest Washington and Mexico City in His Behalf. Can't Get Bail.

NEW BRUNSWICK, N. J., March 22.—J. Frank Cordova, the eloping partner, is anxious to get President Roosevelt or some of the Washington authorities interested in his behalf. He declares he has been treated outrageously by the New Jersey courts, and has asked his counsel, Lawyer H. B. Cook, what he can do to get aid from Washington.

Lawyer Cook informed him they might interest the court of pardons in his behalf.

Cordova will write to President Diaz, also the secretary of war in Mexico, and have them communicate with Washington. He hopes something favorable to him will result from action taken by the Mexican government. Cordova is still in jail unable to get bail, which was fixed yesterday at \$4,000.

### OFF FOR SANTO DOMINGO.

MAYAGUEZ, Porto Rico, March 22.—The fourteen Congressmen, mostly members of the Rivers and Harbors Committee, with their wives, who arrived at San Juan March 17, on the transport Sumner, sailed from here today for Santo Domingo.

### DIED.

DUVALI.—On Tuesday, March 21, 1935, at 10 p. m., WILLIAM ALFRED, beloved son of Lewis E. and Ellen C. Duvali, in the twenty-eighth year of his age.

Funeral Friday, March 24, at 2 p. m., from his late residence, 474 E. street southwest. Relatives and friends respectfully invited to attend.

(Baltimore, Md., papers please copy.) mh2-21

FRANCIS.—On Tuesday, March 21, 1935, WILLIAM FRANCIS WOOD, a veteran of the late civil war. He was a man well known for his honesty; a good citizen, and a good friend.

Remains will be buried at St. Cyprian's Thursday morning at 9 o'clock.

Funeral Friday, March 24, at 10 a. m., at her residence, 1818 Eighth street northwest. MARY E., beloved wife of John F. KING (nee Grier).

Funeral Thursday, March 23, at 1 p. m. Relatives and friends invited. mh2-21

### IN MEMORIAM.

ROBERTS.—In loving remembrance of my dear daughter, HELEN L. ROBERTS, who died one year ago today, March 21, 1934.

She entered the portals with rapture aglow. She heard at the entrance an echo she knew: 'Twas the voice of her angel—her welcome she sang.

The arches of heaven with that melody rang. —By Her Mother and Sister.

1 Jewel and Gold-band Mounted-back Comb; worth 75c ..... 49c

## A Dollar's Worth Free to Any Rheumatic Sufferer

I ask no deposit—no reference—no security. There is nothing to risk—nothing to promise—nothing to pay. The blood carries the Rheumatic sufferer who does not know my remedy may have a full dollar's worth free to try.

I will make this liberal offer because I know that Dr. Shoop's Rheumatic Remedy may be relied upon ALWAYS to bring the utmost relief that medicine can. Years before I discovered this remedy I studied the nature of Rheumatism. For Rheumatism is really

### Crystallized Poison!

Your blood is always full of poison—the poison you eat and drink and breathe into your system. It is the purpose of the blood to absorb and carry off this very poison. And the kidneys, which are the blood filters, are expected to cleanse the blood and send it back through the system clean, to gather more poison, which they, in turn, will eliminate.

But sometimes the kidneys fail. And sometimes from some other cause, the blood gets so full of poison that they cannot absorb it all. This is the case in Rheumatism. The poison accumulates and crystallizes. The crystals look like little grains of sugar or of the white sand. The blood carries them and they increase in size. Then, when it can carry them no longer, it deposits them in a joint—on a bone—anywhere.

The twinges in your leg—the dull ache in your arm on a rainy day—these are the out-ward signs of the unseen crystals. And the twisted limbs and unspeakable anguish of the sufferer who has allowed his symptoms to go unheeded and unattended for years—these are the evidences of what Rheumatism, neglected, can do.

Rheumatism includes lumbago, sciatica, neuralgia, gout—for all these are the results of rheumatic poison in the blood.

Finally, the first thing to do is to remove the poison. But this is not enough. The formation of the poison must be stopped so that nature may have a chance to dissolve and eliminate the crystals which have already formed. Unless this is done there can be no cure—no permanent relief.

I searched the whole world for a specific for Rheumatism—something that I or any physician could feel safe in prescribing—something that we could count on not only occasionally, but ALWAYS. For the ravages of Rheumatism are everywhere, and genuine relief is rare.

Mild cases are sometimes cured by a single package. On sale at forty thousand drug stores.

## Dr. Shoop's Rheumatic Remedy
